SOCIAL COMPLIANCE

Sedex;

"The Supplier Ethical Data Exchange (Sedex) is a not-for-profit membership organisation for businesses committed to the continuous improvement of ethical performance within their supply chains." It was founded in 2001 by a group of retailers with the goal of converging social audit standards and monitoring practices.

As Trio family, we are a member of Sedex platform to support responsible and ethical business practices and improvement processes.

Disney;

"The Walt Disney Company has created the International Labor Standards Program (ILS Program) to make safe, inclusive and respectful workplaces where its branded products are produced."

As Trio family, we have successfully audited from ILS.

TAKE CARE OF YOURSELF SOCIETY AND THE PLANET

"Ensure healthy lives and promote well-being for all at all ages. Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels" (SGDs).

Trio aims to transform its social responsibility awareness into corporate culture. For this purpose, it follows national and international ethical rules and continuously improves its employee's personal rights, working, health and safety conditions.

TRIO 2021 SUSTAINABILITY GOALS

WASTE MANAGEMENT

Waste management is a discipline which starts from the design phase of any product, covers production, consumption, waste generation, recycling and / or disposal of waste.

For a proper waste management model it is necessary to be ensure from the reducing at its source, separation according to its characteristics, collection, temporary storage, recovery, transportation, disposal and post-disposal control. In an integrated waste management system, it is aimed to ensure sustainability in both environmental and economic terms by evaluating the elements of waste management as a whole.

As Trio family, we aimed to prevent waste at its source wherever possible. We made changes in our lightning system for less emissions, less toxic waste and less waste heat. In addition, we carry out practices for reuse and recycling of wastes that we can not prevent at the source. We collect packaging wastes separately at the source and ensure that they are managed in recycling facilities.

WHO IS RESPONSIBLE?

- Persons!
- All components belonging to the public and private sectore!
- Decision makers!
- States!
- Sustainable waste management is the responsibility of all components of humanity as consumers of the ecosystem!

We have the opportunities to implement waste management. Do not think of it as a small step just take action

SUSTAINABLE SAMPLE BAGS

Reuse is the using of a product again in the same or different ways and for the same or different purposes. It is one of the best ways to stop wasting and there are tons of opportunities to put this into practice every day.

With the reuse applications;

- Prevent pollution caused by reducing the need to new raw materials.
- Save energy.
- Reduce environmental footprints.
- Help sustain the environment for future generations.
- Save money.

As Trio family, we produce denim sample bags by reusing the fabrics coming from the washing test. Thus, we do not use extra sample bags when sending our product samples to our customers.

TRIO 2021 SUSTAINABILITY GOALS

To support and implement best available environmental practices and to promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive business at all levels.

We believe that even one person is enough to make a difference!
